World Tsunami Awareness Day

The resolution to designate November 5 as “World Tsunami Awareness Day” was proposed jointly by 142 countries including Japan, and adopted by consensus at the United Nations General Assembly in December 2015. The designation of November 5 derives from the anecdote known as “Inamura-no-Hi” in which Hamaguchi Goryo saved the villagers’ lives from the tsunami resulting from the Ansei Nankai Earthquake by setting fire to his rice sheaves to guide people to higher ground on November 5.
